

Why Use ElcomSoft for Your Password Recovery Needs

Long-Term Reliability. ElcomSoft will soon celebrate its 20's anniversary. The company has been successfully sailing through all the world's booms and busts, demonstrating profitability and steady growth year after year. Today, ElcomSoft has 25 employees, and is still hiring. For the last decade, the company has maintained its exclusive involvement into information security, researching and developing innovative password recovery tools.

Financial Security. ElcomSoft is privately owned and financed. We do not depend on conjuncture or the state of the world or local markets. We don't have public disclosure obligations, and are able to keep our client's confidential information truly confidential.

In-House Development and Quality Control. Our company performs all phases of development, testing and quality control exclusively in-house. We never outsource, license or leak any part of the code to any third party. ElcomSoft maintains full control on the code, releasing products of the highest quality meeting the strictest demands for reliability and performance.

Headquarters in Moscow. ElcomSoft is an incorporated, off-line company with headquarters in Moscow. You can call our phone line or meet with our staff. ElcomSoft participates in conferences and trade shows on information security worldwide. You can meet with us during conferences in the US, Europe and Asia.

Patented Innovations. Our technological innovations set industry standards. ElcomSoft has one US patent granted, and several pending. Our trademarks and copyrights are duly registered and protected. ElcomSoft's patented innovations include GPU acceleration allowing to perform password recovery up to 20 times faster compared to Intel top of the line quad-core CPUs by using consumer-grade video cards with ATI or NVIDIA chips. Thunder Tables, yet another patented technology, ensures guaranteed recovery of password-protected Microsoft Word and Microsoft Excel documents in just seconds instead of hours or days.

Scientific Research. Our researchers have degrees in cryptography, with numerous papers published in scientific sources. Their research leads technological innovations enabling ElcomSoft recover passwords orders of magnitude faster than competitors.

Approved by Certification Authorities. For many years, ElcomSoft maintains its status as a Microsoft Gold Certified Partner, Intel Software Partner, and is an active member of Russian Cryptology Association (RCA) and Computer Security Institute. ElcomSoft is registered with DUNS and CCR/CAGE.

Wide Dealer Network. ElcomSoft has partners and resellers worldwide, offering its customers an opportunity of local sales. Our partners provide pre-sale and technical support in many languages, often offering on-site installation, configuration and training for our products.

Our Customers. Our customers are ElcomSoft's most valuable asset. ElcomSoft products are used by hundreds of thousands of happy customers, with many clients returning to purchase other products from us. We serve government and commercial organizations, including security departments, IT security audit departments and independent security professionals, as well as help desks of major corporations.

Our solutions are used by most of the Fortune 500 corporations, multiple branches of the military all over the world, governments, forensics and intelligence services in many countries including FBI, NSA/CSS, The Federal Security Service of the Russian Federation (FSB), as well as all major accounting companies. ElcomSoft supplies law enforcement and criminal investigation departments with password recovery tools, and helps legal authorities fight cyber-crime by providing consulting and sharing its technological expertise in information security.

We Set Industry Standards. ElcomSoft products have become de-facto industry-standard, are studied in training sessions, and are covered in textbooks. Our products are part of the Certified Ethical Hacker initiative, a program that certifies the skills of security officers and consultants, auditors, site administrators, and professionals concerned about information security and the integrity of the network infrastructure.

In-House Customer Care. ElcomSoft is dedicated to providing the best service to its customers. Online and phone-based customer support is available. Technical support is always provided by ElcomSoft's in-house specialists; no confidential information leaves our premises, ever.
